RE: Permitting
ACT/045/003
Tooele County, Utah

Dear Mr. Reed:

After our phone conversation the other day, I looked up your file and discovered that, while a Mining and Reclamation Plan was submitted for your operation in 1977, it was never acted upon or formally permitted by the Division. Therefore, I am requesting at this time that you submit updated information on your entire operation (old as well as proposed new disturbances and facilities) so that the entire operation can be permitted as a whole. I am sorry for any extra inconvenience this may cause you, but I feel that this would be the most expeditious way to take care of this oversight on our part.

I am enclosing an MR Form 1 to be filled out as a permit application, and a copy of the Utah Mined Land Reclamation Act, Title 40-8 (1953). You may combine the two areas of disturbance (past and future) on one form, as long as they are addressed separately and the delineation between old and new disturbances is clearly stated. A topographic map of the entire area, showing boundaries of old disturbance and location of surface facilities and the proposed areas of new disturbance would be extremely helpful.

Again, I apologize for creating additional work for both of us, but I feel that we can clear this up in the near future. Please don't hesitate to call if you have specific questions on filling out the forms or on the permitting process in general. Thank you.

Sincerely,

Susan C. Linner
